

# Pat-Add LE 1477

## Silicone Free Leveling Agent for SB Systems

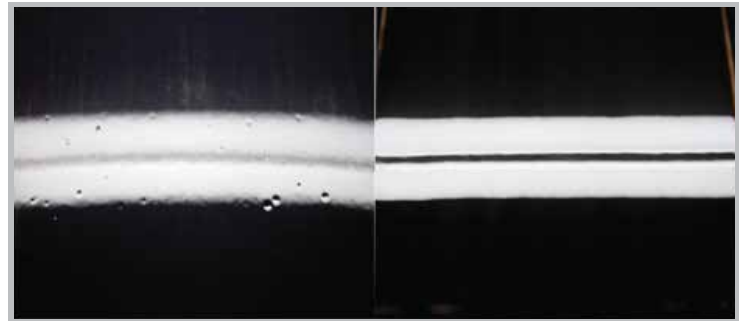

PATCHAM

**Pat-Add LE 1477** a fluoro-modified short chain polyacrylate polymer leveling and slip agent for solvent borne systems. Innovatively designed to meet environment regulatory requirements for fluoro carbon chain substances.

### Features of Pat-Add LE 1477

- Efficient surface tension reduction  
Improves substrate wetting, flow, leveling and avoids defects like cratering, cissing etc.
- Better slip properties than conventional leveling agents
- Imparts excellent DOI and Gloss to paint films

#### 2K PU Topcoat Clear
